注意事项:

1. 该学习材料仅限猩际学员与老师内部交流使用;
2. 学习资料应当配合课程使用, 若老师上课有提出修改建议, 请以老师课上建议为准;
3. 使用时并不一定要一成不变, 可根据自身情况稍作更改, 适合自己的才是最好的。

本学习材料包含:

1. DI 学习资料
2. RL 学习资料
3. SWT 连接词表&使用范例
4. WE 学习资料
5. SST 学习资料

猩际 Describe Image 学习资料

*DI 整体答题原则：

1. 答题要言之有物
2. 不要说和题目内容毫不相关的废话
3. 不要用过度重复的句式

猩际新 DI 答题框架分成 3 个大类（数据图，流程图，图片题）

一、数据图答题框架：

开头明确主题的句式（一句话）：

- The graph shows us the ... (填入图片标题/主题)
- This image provides information about ... (填入图片标题/主题)
- The graph outlines the ... (填入图片标题/主题)

中间阐述图片信息，数据图的描述方向（至少选择 2 个不同方向，总共 4-5 句话进行描述）：

1. 描述单个点
2. 比较 2 个点的大小
3. 描述最大/最小

描述单个点的句式：

- It seems that the figure of ... is ...
- Based on the graph, it can be found that the value of ... is about...
- It can be seen from the graph that the value of ... is nearly ...
- According to the graph, the value of ... appears to be ...

比较 2 个点的大小的句式：

- From the graph, it can be seen that the number of ... is around ..., which is greater/smaller.
- The graph reveals that the number of ... is around ..., which is higher/lower.
- Looking at the graph, I notice the number of ... is about ..., which is greater/smaller.

描述最大最小：

- The highest value of ... is observed in ..., which is ...
- The largest amount of ... is displayed in ..., which is ...
- The smallest value of ... is found in ..., with a total of ...
- The least amount of ... can be seen in ..., with a sum of ...

结尾概括说明整体情况（一句话），可以描述整体趋势或者点明哪个部分数据更大一些，如果觉得这些对你还是比较困难，至少可以再次点明讨论主题（切记一定不要说无意义的套话，比如 In conclusion, this graph is very informative 就不要再说了）：

1. 整体趋势：

- Overall, the graph shows an increase/decrease in...
- To sum up, the data shows a steady rise/fall in...
- In summary, we can see from the graph that ... is going up/down.

2. 不同类别，哪个整体更大一些：

- Overall, ... has a greater value.
- The data clearly shows that ...accounts for a larger part.
- In summary, ... has a higher figure.

3. 再次点明图片主题：

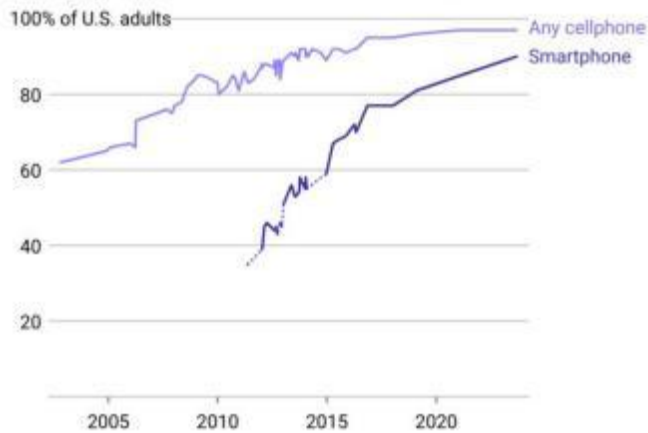

- In summary, this graph shows details about...
- In conclusion, this graph provides information about...
- Overall, this graph outlines...

数据图示范：

The rise of the smartphone

Most cellphone owners in the U.S. have smartphones.

Note: Before 2023, surveys were conducted over phone. 2023 responses were collected via web and mail.

Data source: Pew Research Center

This image provides information about the rise of the smartphone.

It can be seen from the graph that the value of smartphone in 2010 is nearly 30.

Looking at the graph, I notice the number of smartphone in 2015 is about 60, which is greater.

The largest amount of any cellphone is displayed in 2020, which is 90.

The smallest value of any cellphone is found in 2005, with a total of 60.

In summary, this graph shows details about the rise of the smartphone.

二、流程图答题框架：

流程图的开头和数据图一样，开头明确主题（一句话），这里依然可以套用数据图的开头句式。

针对流程图的 body 部分，我们主要呈现的是各步骤的顺序以及每个步骤的名称等，尤其是第一步和最后一个步骤一定要点到。注意一定要按照步骤的顺序来。通常涉及到4-5个步骤，可以根据图片的不同增减步骤的表达。

关于第一步的表达：

- The first step is ...
- The graph shows that the first step is...
- The initial step in this graph is...
- Looking at the graph, the first step is...

关于中间步骤的表达：

- Moving on, the second step is ...
- Furthermore, the second step shows ...
- The graph also shows that the third step is ...
- In addition, the third step can be seen as ...
- The next stage in the process is the fourth step, which involves ...
- Then, the fourth step requires ...
- After ..., the next stage is the ...
- The following step moves to ...
- After that, the process moves to ...
- The next action is to move to ...
- The following step leads to ...
- The final step is ...
- To finish, the last step is ...
- The last step involves ...

流程图的最后可以像数据图一样，再次点明图片主题：

- In summary, this graph shows details about...
- In conclusion, this graph provides information about...
- Overall, this graph outlines...

流程图示范:

The graph shows us the supply chain management.

Looking at the graph, the first step is raw materials.

Moving on, the second step is components.

In addition, the third step can be seen as manufacturers.

After that, the process moves to retailer.

To finish, the last step is consumer.

Overall, this graph outlines supply chain management.

三、图片答题框架：图片题的话不用特别担心内容的呈现是不是非常有逻辑，因为我们在描述图片时本身就是有些主观的，也没有什么所谓的标准答案，在描述时我们往往可以从图片中物体的特征入手。

开头依然是像数据图或者流程图一样，一句话明确主题。

中间阐述图片信息，图片的描述方向通常为：图片中的主要元素或物体的方位以及他们的特征，这些特征通常包括物体的颜色、大小、形状等，请至少描述3-4个不同方位的信息。

中间

- In the middle of the graph, I notice the 颜色/大小/形状 of ... is...
- The graph shows that, in the middle, the 颜色/大小/形状 of ... is...
- I observe that the 颜色/大小/形状 of ...is ...in the middle of the graph.

左边

- To the left of the graph, the 颜色/大小/形状 of ... is
- On the left side of the graph, I notice the 颜色/大小/形状 of ... is ...
- On the left part of the graph, we find that the .颜色/大小/形状 of ... is ...

右边

- What's more, we can see from the graph that, at the right corner, there is ..., and the 颜色/大小/形状 is ...
- Additionally, the graph shows that in the right part, we see..., and its 颜色/大小/形状 is ...
- The graph also reveals that at the right corner, ... is present, and its 颜色/大小/形状 is ...

上边

- In the top part of the image, we can see the 颜色/大小/形状 of ... is
- At the top of the image, we observe the 颜色/大小/形状 of ... is
- The top part of the image displays the 颜色/大小/形状 of ... is

下边

- ... is at the bottom of this graph, which is 颜色/大小/形状.
- At the bottom of the graph, we find ..., and its 颜色/大小/形状 is...
- ... is placed at the bottom of the graph, and we can see it is 颜色/大小/形状.

图片的最后可以像数据图/流程图一样，再次点明图片主题。

图片题示范：

The graph shows us two people in the park.

In the middle of the graph, I notice the color of the lady is red.

On the left part of the graph, we find that the color of the tree is green.

The top part of the image displays the size of the mountain is very large.

Grass is placed at the bottom of the graph, and we can see it is green.

In conclusion, this graph provides information about people in the park.

Retell Lecture 部分

*RL 整体答题原则：

1. 答题要言之有物
2. 不要说和题目内容毫不相关的废话
3. 不要用过度重复的句式

答题框架：开头明确讲座主题，中间呈现至少5-6个来自讲座中的信息句，可以不用收尾。

开头明确主题（主题句一般出现在音频的开头1-2句）

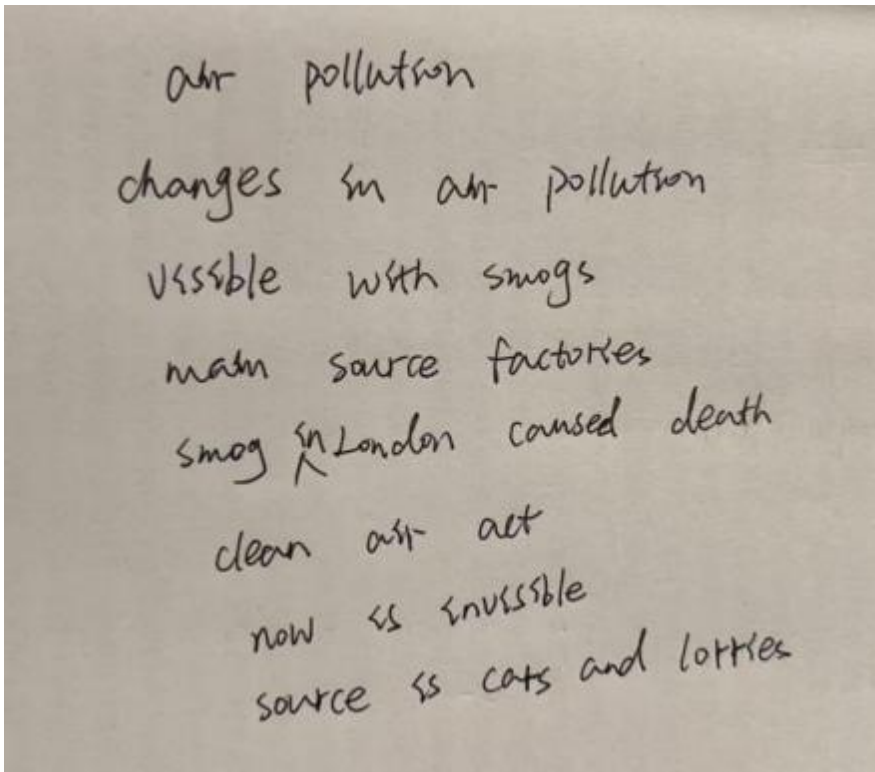

- The talk was about ...
- This lecture is about ...
- The talk was that ...
- The presentation was centered on ...

中间通过过渡词串联内容句(将自己笔记中的内容都用下列句式讲完，每句话一定要用不同的句式)

- The speaker first mentioned + 句子
- And then, the speaker has explained that + 句子
- Followed by that, in the lecture, they mentioned + 句子
- From the lecture, we know that + 句子
- So basically, according to the lecture, + 句子
- In addition/what's more, + 句子
- In the end, the speaker said + 句子

RL答题示范:

The talk was about air pollution.

The speaker first mentioned changes in air pollution.

And then, the speaker has explained air pollution is visible with smogs.

Followed by that, in the lecture, they mentioned smog in London caused death.

In the end, the speaker said that the source of pollution is cars and lorries.

SWT 中的逻辑关系&连接词

因果关系		
because	I liked swimming and hiking because they were fun.	通常情况下 because 前面不要加逗号
since	Since Hubert is not very smart, he never experiences any fear.	
so	My computer crashed, so I lost all my work.	不能把 so 替换成 therefore 或 thus。so 是连接词，therefore 和 thus 都是副词。
转折关系		
but	Mary is very popular among her classmates, but her poor exam scores make her teachers worried.	不能把 but 替换成 however，因为 however 并不是连接词。
although/ though	Although / Though Mary is very popular among her classmates, her poor exam scores make her teachers worried.	
并列关系		
and	Mary is very good at sports, and her classmates are very proud of her.	And 作为两个分句的连接词时，前面需要加逗号
分号	Mary is very good at sports; her classmates are very proud of her.	分号可以连接并列且同级的分句，或者连接两个语义联系紧密的分句
目的性关系		
in order to	I've studied very hard in order to score high in my exams.	
描述性关系（时间、地点、作用的等等）		
when	When it started to rain, we went inside.	
while	While Peter is spending a good time on television, Mary is practicing her piano.	
where	In 1963 we moved to Boston, where my grandparents lived.	
which	Mindfulness which is achieved by meditation techniques is very beneficial.	
that	The research result that has surprised many is undergoing further investigation.	
双逗号	Huber, a young man who never fears, is not very smart.	
举例		
such as	This job requires various skills such as public speaking, coding and driving.	

猴际 Summarize Written Text 学习资料

1. 猴际 SWT学习资料

<Sentence 1>, **and** <sentence 2>, **which means that** <sentence 3>, **but** <sentence 4>, **so** <sentence 5>.

2. 猴际 SWT学习资料具体示范

原文

In 2005 Japan had the highest median age of all countries in the world, while Australia's population was only moderately aged. Some 50 years ago the demographic situation was quite different, with the median age of Australia's population being seven years older than Japan's.

The ageing of the population is a major issue for Australian policy makers, particularly in regard to the long-term implications for reduced economic growth and the increasing demand for Age Pensions, and health and aged care services. As the population ages, growth in the number of people of working age will slow, while the proportion of people of retirement age will increase.

Sustained population ageing also leads to slowing or negative population growth. While declining population growth in developed countries is welcomed by some environmentalist and social scientists, economists tend to agree that population decline brings gloomy economic prospects. In addition to the decrease in the labor supply, the demand side of the economy may be affected through shrinking markets for goods and services.

How quickly this occurs depends on the dynamics of fertility, mortality and overseas migration.

While a moderate pace of demographic change allows for gradual adjustment of the economy and policies to the changing population demographics, rapid changes are more difficult to manage. As a result, governments and society as a whole may need to take actions to address these issues.

Key Points:

1. Australia's population was only moderately aged;
2. the ageing of the population is a major issue for Australian policy makers;
3. sustained population ageing leads to slowing or negative population growth;
4. population decline brings gloomy economic prospects;
5. governments and society as a whole may need to take actions to address these issues.

参考答案

Australia's population was only moderately aged, **and** the ageing of the population is a major issue for Australian policy makers, **which means that** sustained population ageing leads to slowing or negative population growth, **but** population decline brings gloomy economic prospects, **so** governments and society as a whole may need to take actions to address these issues.

猩际 Write Essay 学习资料

Nowadays, whether (topic 句) has attracted numerous controversies and drawn the public's attention. Some people believe that (一个观点句), while others hold the view that (另一个观点句). In my opinion, (你的观点句) due to (A) and (B) reasons.

Firstly, the (A) reason is why I think (改写你的观点句). Although potentially **positive/negative** impacts of (topic 句的主题词, 如电脑、法律等) must be taken into account, I still reckon that (topic 里的主题词) has in many ways enormously **harmed/enriched** people's lives. For example, a well-known American scientist Einstein once said that (论据一, 支持观点). It is thus clearly shown that (改写你的观点句).

Moreover, another factor that should be considered is the (B) reason. As far as society is concerned, the ultimate aim of (topic 里的主题词) is to (扣题的话). For instance, a recent article published **in/by Scientific American/The Economist** revealed that (论据二, 且支持观点). Undoubtedly, this is a clear indication that (改写你的观点句).

To sum up/In conclusion, I hold the view that (你的观点句) because of (A) and (B) reasons outlined above. To address this issue, the government and society should make a concerted effort to find solutions.

(words: 156)

可以根据题目来替换 **A/B** 的词：

- technological
- environmental
- financial
- educational
- social
- cultural

与人有关的可以替换为：

- physical
- psychological

1. Essay 类型 (Agree or Disagree)

Essay topic:

Some people believe law changes human behaviour. To what extent do you agree or disagree?

WE 学习资料具体示范_1

Nowadays, whether **the law changes human behaviour** has attracted numerous controversies and drawn the public's attention. Some people believe that **the law can change human behaviour**, while others hold the view that **there is no relationship between law and human behaviour**. In my opinion, **the law does have an influence on human behaviour** for **social** and **psychological** reasons.

First and foremost, the **social** reason is why I think **the law has an influence on human behaviour**. Although potentially **negative** impacts of **law** must be taken into account, I still reckon that **the existence of law** has in many ways enormously **enriched** people's lives. For example, a well-known American scientist Einstein once said that **people are generally afraid of receiving any form of legal punishment**. It is thus clearly shown that **human behaviour is changed by law**.

In addition, another factor that should be considered is the **psychological** reason. As far as society is concerned, the ultimate aim of **the law** is **to protect people**. For instance, a recent article published **by The Economist** reveals that **80% of people fasten their seat-belts in cars after a traffic law has been enacted**. Undoubtedly, this is a clear indication that **the law has a positive impact on individuals' behaviour**.

In conclusion, I hold the view that **the law changes human behaviour**. To address this issue, the government and society should make a concerted effort to find solutions.

(words: 235)

2. Essay类型 (两个问题)

Essay topic:

As a result of advances in medical care, average life expectancy is increasing for men and women. Do you think most people will see this as a positive development? What are the disadvantages of an ageing population for individuals and society? Support your point of view with reasons and/or examples from your own experience or observations.

WE 学习资料具体示范_2

Nowadays, whether **increasing life expectancy is a positive development** has attracted numerous controversies and drawn the public's attention. Some people believe that **living longer is very beneficial**, while others hold the view that **it is very harmful**. In my opinion, **increasing life expectancy has an advantage and a disadvantage** for **social** and **financial** reasons.

First and foremost, the **social** reason is why I think **living longer is beneficial**. Although potentially **negative** impacts of **increasing life expectancy** must be taken into account, I still reckon that **long life expectancy** has in many ways enormously **enriched** people's lives. For example, a well-known American scientist Einstein once said that **living longer will allow people to accompany their families longer**. It is thus clearly shown that **increasing life expectancy is great for society**.

Moreover, another factor that should be considered is the **financial** reason. As far as society is concerned, the ultimate aim of **families** is **to support the elderly**. For instance, a recent article published by Scientific American revealed that **families have great financial pressure in supporting elderly people**. Undoubtedly, this is a clear indication that **the ageing population does have some negative influences on many families**.

To sum up, I hold the view that **increasing life expectancy is certainly a positive development**. However, it also has the disadvantage of **financial pressure**. To address this issue, the government and society should make a concerted effort to find solutions.

(words: 235)

1. Essay 类型 (开放式)

Essay topic:

Culture shock is a new worry leading to less immigration. What are the possible options to eradicate this issue?

WE 学习资料具体示范_3

Nowadays, **solving the problem of culture shock, which is a new worry leading to less immigration**, has attracted numerous controversies and drawn the public's attention. Some people believe that **people should travel more**, while others hold the view that **there should be more events hosted to bridge the gap between people from different cultures**. In my opinion, **this problem can be solved by individuals and governments working together**.

First and foremost, **governments need to host more events for people from different cultures**. Although potentially **negative** impacts of **community events** must be taken into account, I still reckon that **community events** have in many ways enormously **enriched** people's lives. For example, a well-known American scientist Einstein once said that **people will have a better understanding of each other if they spend more time together**. It is thus clearly shown that **culture shock can be reduced if people understand other cultures better through community events**.

Moreover, another factor that should be considered is **that individuals should travel more**. As far as society is concerned, the ultimate aim of **travel** is **to experience the unknown**. For instance, a recent article published in Scientific American revealed that **80% of people are more willing to accept new cultures after travel**. Undoubtedly, this is a clear indication that **culture shock will become less of a problem if people travel more**.

In conclusion, I hold the view that **culture shock can be managed by both individuals and governments**. To address this issue, the government and society should make a concerted effort to bridge the gap between different cultures.
